

## Fuel Supply

IAME SERIES BENELUX will select a mandatory service station for each event. SP98 fuel will be mandatory (SP95 is prohibited).

It is **imperative** to refuel at the **prescribed** station, **communicated** by the organizers before each event.

A fuel sample will be taken before each event at the prescribed station; this will serve as a reference for checking the mixture used by competitors.

The rigorous fuel control procedure (IAME Series RT Appendix No. 01) for the prescribed station will not tolerate any deviation from the reference sample.

By not refueling at the prescribed station, drivers run the risk of running with non-compliant fuel.
