

Engine Usage Rules

1. Rules for Drivers in the "BENELUX Zone" *(1)

All drivers from the "BENELUX Zone" must use engines purchased from the IAME-Belgium or IAME Netherlands authorized dealer network. A **permanent passport** is provided with the engine.

These engines must be sealed by an authorized IAME-Belgium or IAME Netherlands dealer (List in the appendix).

The responsibility for sealing the engine to ensure its conformity lies with the authorized dealer who applies the seal: the dealer must complete the passport, affix their stamp, and sign each time the engine is sealed.

Sealing is carried out in accordance with Appendix No. 6 of the Technical Regulations.

Authorized IAME Belgium or IAME Netherlands dealers must provide the IAME Series BENELUX promoter with their stamp and signature using the form provided for this purpose.

No advertising for a "Non-Authorized" dealer may be displayed on an engine, kart, or equipment belonging to a driver from the "BENELUX" zone, including on social media.

Any authorized dealer not present on the site of an IAME Series BENELUX meeting must designate a representative to represent them during any technical inspections.

2. Drivers "Outside the BENELUX Zone" *(2)

All drivers "Outside the BENELUX Zone" using engines not from the "BENELUX Zone" must request a **one-event passport** from IAME-Belgium at the start of the meeting.

The driver or their team manager will provide the seal number and date.

Sealing guarantees the engine's compliance, the driver being responsible for any non-compliance.

A driver "Outside the BENELUX Zone" may also use an engine from the "BENELUX Zone" with a permanent passport.

Sealing is carried out in accordance with Appendix No. 6 of the Technical Regulations.

In the event of exclusion of a driver, team, or competitor for technical non-compliance, the promoter of the IAME SERIES BENELUX reserves the right to authorize or deny participation in subsequent races.
